Serial No. 10/784,054 60130-2012; 02MRA0356

IN THE CLAIMS

Please cancel claims 1 and 4-7.

- 1. (Cancelled)
- 2. (Currently Amended) The method of Claim <u>221</u>, wherein the <u>plastic</u> film is applied by a spraying process.
- 3. (Currently Amended) The_method as recited in Claim <u>22</u>1, wherein the step of applying the back-foamed layer comprises:

applying liquid plastic onto the plastic film after the hardening step; and foaming the liquid plastic to form the back-foamed layer on the plastic film.

- 4.-21. (Cancelled)
- 22. (Previously Presented) A method for manufacturing a vehicle body panel, comprising: applying a plastic film onto a reverse side of a film-like exterior covering; hardening the plastic film; applying a back-foamed layer on top of the hardened plastic film; and adding fibers to the back-foamed layer.
- 23. (Previously Presented) The method as recited in Claim 22, wherein the fibers are added by a long fiber injection method.
- 24. (Previously Presented) The method as recited in Claim 22, wherein the fibers are added by placing a fiber mat onto the hardened plastic film before the step of applying the back-foamed layer.

Scrial No. 10/784,054 60130-2012; 02MRA0356

- 25. (Previously Presented) The method as recited in Claim 22, wherein the fibers are added by being mixed with a material used to form the back-foamed layer.
- 26. (Currently Amended) A method for manufacturing a vehicle body panel, comprising: applying a plastic film onto a reverse side of a film-like exterior covering, wherein the film-like exterior covering is disposed in an open foam die;

hardening the plastic film; and

applying a back-foamed layer on top of the hardened plastic film,

wherein the steps of applying the plastic film, hardening the plastic film, and applying the back-foamed layer are conducted in the open foam die.

- 27. (Previously Presented) The method as recited in Claim 26, further comprising placing at least one insert into the open foam die before the step of applying the back-foamed layer, wherein said at least one insert is embedded into the back-foamed layer after the step of applying the back-foamed layer.
- 28. (Previously Presented) The method as recited in Claim 26, wherein the open foam die comprises an upper mold half and a lower mold half, and wherein the step of applying the backfoamed layer comprises molding the back-foamed layer against the upper mold half to form varying thicknesses in the back-foamed layer.
